

# Signatory Services Directory

Below is a list of signatories who are able to provide support to signatories in the following areas.

Signatory	Measurement & verification	Target setting & reporting	Planning	Tools	Carbon offsets	Other Services
<a href="#">3R</a>			Support to develop transition plans/carbon management plans	Tools/resources to engage employees in sustainability/emission reduction		3R Group provide a range of services which contribute to creating a circular economy which can help drive down carbon emissions. Our broad range of skills and expertise cover waste minimisation, resource recovery, product stewardship, packaging, carbon, reporting, and behaviour change.
<a href="#">Aecom</a>	Measurement of emissions, including determining boundary of scope 3 emissions	Technical support on setting targets aligned with science of keeping warming to 1.5degC Understanding climate change risks and opportunities (not as formalised as using TCFD) Applying TCFD framework Emissions reporting	Support to develop transition plans/carbon management plans	Carbon footprint calculators		Support with developing adaptation plans Tools/resources to support businesses to assess nature-based risk, biodiversity impacts, valuing natural capital
<a href="#">Anderson Lloyd</a>						New Zealand Emissions Trading Scheme (ETS) Climate Change Response Act Climate change aspects of the Resource Management Act (RMA) Carbon trading Carbon forestry projects and bilateral offtake arrangements
<a href="#">Aurecon</a>		Applying the TCFD framework Understanding climate change risks and opportunities (not as formalised as using TCFD)	Support to develop transition plans/carbon management plans Support with developing adaptation plans			Process heat decarbonisation Alternative energy studies and development Transport emissions management Climate change physical and transitional risk assessments

Signatory	Measurement & verification	Target setting & reporting	Planning	Tools	Carbon offsets	Other Services
<a href="#"><u>Beca</u></a>	<p>Measurement of emissions, including determining boundary of scope 3 emissions</p> <p>Technical support on setting targets aligned with science of keeping warming to 1.5degC</p> <p>Emissions measurement/management software</p> <p>Independent verification of emissions</p>	<p>Emissions reporting</p> <p>Applying the TCFD framework</p> <p>Understanding climate change risks and opportunities (not as formalised as using TCFD)</p>	<p>Support to develop transition plans/carbon management plans</p> <p>Support with developing adaptation plans</p>	<p>Tools/resources to engage employees in sustainability/emission reduction</p> <p>Emissions measurement/management software</p> <p>Carbon footprint calculators</p>		<p>Transport emissions management</p> <p>Buildings ESD advice (GreenStar, GreenMark, LEED, WELL, Net Zero, CORE, Living Building, NABERSNZ, fossil fuel exit strategies, energy audits, passive design, thermal comfort, parametric modelling, building controls, lifecycle assessment, procurement support)</p> <p>Industrial ESD advice (performance modelling, energy audits, fossil fuel exit strategies, refrigeration control optimisation, on-site renewables assessment, waste minimisation, water conservation, logistics and supply chain optimisation, alternative energy review, packaging reviews, procurement support)</p>
<a href="#"><u>Carbon EES</u></a>	<p>Measurement of emissions, including determining boundary of scope 3 emissions utilising in-house expertise</p>	<p>Emissions reporting provided via their e-Bench® software system</p>	<p>Support to develop transition plans/carbon management plans utilising in-house expertise</p>	<p>Emissions measurement/management software provided via their e-Bench® software system</p>		<p>Quantifying the financial value of successful climate change mitigation actions. We have built a specific software system called e-Calc™ that addresses this and it reports on savings across a wide range of actions like transitioning to an EV fleet, energy efficiency measures, life cycle procurement, good IT management of equipment and servers, NABERS NZ ratings, waste management and recycling, etc.</p>
<a href="#"><u>DETA Consulting</u></a>	<p>Measurement of emissions, including determining boundary of scope 3 emissions</p>		<p>Support to develop transition plans/carbon management plans</p>			<p>Development and delivery of low/zero carbon capital projects</p> <p>Verification of project outcomes</p>

Signatory	Measurement & verification	Target setting & reporting	Planning	Tools	Carbon offsets	Other Services
<a href="#">EECA</a>				<p>Energy Management Journey</p> <p>Rightware for Business allows you to compare office equipment, including whiteware, televisions and computer monitors.</p> <p>Vehicle Total Cost of Ownership tool</p> <p>Wood Energy Calculators</p> <p>Climate Action Toolbox – tailored advice and support for SMEs</p>		<p>Co-funding: Government Investment in Decarbonising Industry Fund, accelerating decarbonisation of business. The programme is a partnership between businesses and government and covers a broad number and type of projects.</p> <p>Co-funding: Low Emission Transport Fund to support the demonstration of high potential and replicable solutions, and adoption of low emission transport technology, innovation and infrastructure to help accelerate the decarbonisation of the New Zealand transport sector.</p> <p>Co-funding: Technology Demonstration programme, for adoption of new low emissions tech.</p> <p>For eligible organisations EECA provides co-funding for: Energy audits, energy graduates, energy systems optimisation, feasibility studies and the Energy Transition Accelerator, which develops a long-term pathway to emissions reduction by identifying technically and economically viable decisions and investments.</p> <p>Graduate support: Co-funding for an energy graduate's salary costs, to help your business analyse how energy is being used and find the best ways to make savings.</p> <p>Gen Less: General business energy management advice and resources for lowering emissions at work sites and on the road.</p> <p>Regulation: Joint E3 programme with Australia to prevent inefficient products and appliances from being sold in New Zealand.</p> <p>Publicly Available Specifications to provide best practice specifications on non-regulated products.</p>
<a href="#">Ekos</a>	<p>Measurement of emissions, including determining boundary of scope 3 emissions</p> <p>Independent verification of emissions</p>	<p>Technical support on setting targets aligned with science of keeping warming to 1.5degC</p> <p>Emissions reporting</p> <p>Understanding climate change risks and opportunities (not as formalised as using TCFD)</p> <p>Applying the TCFD framework (developing this capability at present)</p>	<p>Support with developing adaptation plans</p> <p>Support to develop transition plans/carbon management plans</p>	<p>Tools/resources to support businesses to assess nature-based risk, biodiversity impacts, valuing natural capital</p> <p>Carbon footprint calculators</p>	Carbon offset advice/purchasing	In setting services - allowing business to develop their own offset projects
<a href="#">Ecotricity</a>						Only supplier of Toitu carbonzero certified electricity in the NZ market

Signatory	Measurement & verification	Target setting & reporting	Planning	Tools	Carbon offsets	Other Services
<a href="#">EmSol</a>		Technical support on setting targets aligned with science of keeping warming to 1.5degC	Support to develop transition plans/carbon management plans	Tools/resources to engage employees in sustainability/ emission reduction  Carbon footprint calculators		Energy/ Carbon Audits
<a href="#">ESP</a>	Measurement of emissions, including determining boundary of scope 3 emissions	Technical support on setting targets aligned with science of keeping warming to 1.5degC  Emissions reporting  Understanding climate change risks and opportunities (not as formalised as using TCFD)	Support to develop transition plans/carbon management plans	Emissions measurement/ management software  Tools/resources to engage employees in sustainability/ emission reduction  Carbon footprint calculators		NABERSNZ ratings
<a href="#">KPMG</a>	Measurement of emissions, including determining boundary of scope 3 emissions  Independent verification of emissions	Technical support on setting targets aligned with science of keeping warming to 1.5degC  Emissions reporting  Understanding climate change risks and opportunities (not as formalised as using TCFD)  Applying the TCFD framework	Support with developing adaptation plans  Support to develop transition plans/carbon management plans	Tools/resources to support businesses to assess nature-based risk, biodiversity impacts, valuing natural capital  Carbon footprint calculators	Carbon offset advice/purchasing	Internal carbon pricing  Climate Governance  Climate Financing
<a href="#">Oxygen Consulting</a>	Measurement of emissions, including determining boundary of scope 3 emissions  Independent verification of emissions	Technical support on setting targets aligned with science of keeping warming to 1.5degC  Emissions Understanding climate change risks and opportunities (not as formalised as using TCFD)  Applying the TCFD framework reporting	Support to develop transition plans/carbon management plans  Support with developing adaptation plans		Carbon offset advice/purchasing	
<a href="#">PWC</a>	Measurement of emissions, including determining boundary of scope 3 emissions  Independent verification of emissions	Technical support on setting targets aligned with science of keeping warming to 1.5degC  Emissions reporting  Understanding climate change risks and opportunities (not as formalised as using TCFD)  Applying the TCFD framework	Support to develop transition plans/carbon management plans  Support with developing adaptation plans	Emissions measurement/ management software  Tools/resources to support businesses to assess nature-based risk, biodiversity impacts, valuing natural capital  Carbon footprint calculators	Carbon offset advice/purchasing	

Signatory	Measurement & verification	Target setting & reporting	Planning	Tools	Carbon offsets	Other Services
<a href="#">Toitū Envirocare</a>	Measurement of emissions, including determining boundary of scope 3 emissions  Independent verification of emissions	Technical support on setting targets aligned with science of keeping warming to 1.5degC  Emissions reporting  Understanding climate change risks and opportunities (not as formalised as using TCFD)  Applying the TCFD framework	Support to develop transition plans/carbon management plans  Support with developing adaptation plans	Emissions measurement/ management software  Tools/resources to support businesses to assess nature-based risk, biodiversity impacts, valuing natural capital  Carbon footprint calculators	Carbon offset advice/purchasing	Independent certification against accredited frameworks and global standards for climate performance claims  Carbon Disclosure Programme reporting and verification
<a href="#">thinkstep-anz</a>	Measurement of emissions, including determining boundary of scope 3 emissions  Independent verification of emissions	Technical support on setting targets aligned with science of keeping warming to 1.5degC  Emissions reporting  Understanding climate change risks and opportunities (not as formalised as using TCFD)  Applying the TCFD framework	Support to develop transition plans/carbon management plans	Carbon footprint calculators  Emissions measurement/ management software		Product carbon footprint, Life Cycle Assessment (LCA) and Environmental Product Declarations (EPDs)  Circular Economy Metrics (Material Circularity Indicator)  Responsible Procurement and Circular Supply Chains  Cradle-to-Cradle (C2C) certification  Green Star Strategy and Infrastructure Sustainability Council (ISC) support  Packaging footprint calculators and audits  Workshops and training for internal capacity building  Plain English communication  Infographics
<a href="#">WSP</a>	Measurement of emissions, including determining boundary of scope 3 emissions  Tools/resources to support businesses to assess nature-based risk, biodiversity impacts, valuing natural capital	Technical support on setting targets aligned with science of keeping warming to 1.5degC  Support to develop transition plans/carbon management plans  Emissions reporting  Tools/resources to engage employees in sustainability/ emission reduction  Understanding climate change risks and opportunities (not as formalised as using TCFD)  Applying the TCFD framework	Support with developing adaptation plans	Carbon footprint calculators	Carbon offset advice/purchasing	
<a href="#">Wright Communications</a>		Emissions reporting (including TCFD reporting)  Sustainability Reporting – using <R>, SDGs, GRI etc.		Tools/resources to engage employees in sustainability/emission reduction (communications initiatives)
